FRONT-END DEVELOPER

Front-End developer seeking role on a rapid-paced, innovative development team. Has experience constructing full-stack web applications from planning to deployment. Highly developed troubleshooting capability from experience in startup environment.

PROJECTS

Invoice Generator — *Fullstack (React & Node)*
https://kylewcode-invoice-generator.netlify.app/
https://github.com/kylewcode/invoice-generator

Retrieves a list of available products and services from API resources, populates an HTML form, and enables a user to post an invoice to a database. Includes backend proxy in Express/Node to handle data validation and API key protection.

Formal Letter Generator — *Fullstack (React & Node)*
https://formal-letter-generator.netlify.app/
https://github.com/kylewcode/react-html-letter-v2

Utilizes a 3rd party API to validate user input, display content dynamically, and verify using the Jest testing framework and companion React toolset. Stores API key in backend server written in Express/Node.

EXPERIENCE

Stax | Orlando, FL — *Technical Support Specialist*
FEB 2022 - PRESENT

Provisions MacBook hardware/software for new hires.

Troubleshoots office and employee hardware/software issues.

Sets up and executes live internal company events.

Talent4Startups | Orlando, FL — *Web Designer*
MAY 2021 - FEB 2022

Utilized Tailwind for CSS styling of static site generator.

Transferred media and text content from previous web platform.

Executed autonomous design decisions and submitted them for review.

EDUCATION

University of Central Florida | Orlando, FL — *BFA Animation*
